Opis produktu

H1280-06 22TFF

-
-
-

22TFF is a High Definition soft dome tweeter with a wide surround combining the high frequency dispersion of a ¾" dome with the low frequency characteristics of a 1" dome.

One-piece Sonomex dome and surround allows for very tight production tolerances and high consistency, with a smooth and extended frequency response.

Voice coil windings immersed in magnetic fluid for increased power handling capacity and reduced compression at high power levels.

The chassis is moulded from a stiff and stable glass fibre reinforced polymer material, and its front design offers optimum radiation conditions.

Large ferrite magnet for high efficiency, and good transient response.
