Opis produktu

PW 165/1 L0018-04S
High Quality automotive woofer.

A glass fi brecone, and a stiff low loss rubber surround carefully matched to each other, result in a smooth frequency response, and a clear, precise reproduction of the critical midrange area.

A relatively large voice coil diameter results in high power handling capacity.
The magnet system with a T-shaped cross section of the pole piece gives low modulation distortion.

The bullet shaped phase plug reduces compression due to temperature variations in the voice coil and avoids resonances that would occur in the volume between the dust cap and the pole piece and increases the power handling capacity.

The extremely stiff and stable injection moulded metal basket keeps the critical components in perfect alignment.
